Objective

Front-End Developer specialized in **Angular**, passionate about building **responsive**, **maintainable**, and **scalable** web applications.

Dedicated to writing **clean, modular code** and applying **modern UI/UX principles** to deliver **efficient, user-centered solutions**.

Continuously learning new technologies to stay ahead in the front-end field and deliver high-quality digital experiences.

Experience

Front-End Developer | Freelance Projects

- Developed modern Angular applications integrated with REST APIs.
- Designed reusable UI components and implemented routing and lazy loading.
- Enhanced application performance using Signals and optimized change detection.
- Built responsive UIs with TailwindCSS and Flowbite ensuring accessibility.
- Collaborated on UX improvements, ensuring consistency and performance.

Technical Skills

Frontend: Angular | TypeScript | JavaScript (ES6+) | HTML5 | CSS3 | Bootstrap | TailwindCSS | Flowbite | Responsive Design | UI/UX | Routing | Lazy Loading

Tools: Git | GitHub | VS Code | NPM | Angular CLI | Postman | Figma

Concepts: Component-Based Architecture | Signals | RxJS | API Integration | Debugging | Clean Code

Projects

E-Commerce App (https://github.com/moazallam1/ECommerce)

Built a complete Angular e-commerce application featuring product listing, filtering, cart management, and checkout. Implemented API integration, optimized performance using Signals, and designed an elegant UI with Flowbite.
